

technical data sheet

BOSTIK INSTANT-PRO™ CARPET & CORK TILE ADHESIVE

PRODUCT

Bostik Instant-PRO™ Carpet & Cork Tile Adhesive is a water based trowellable adhesive for bonding most types of soft floor coverings. It is a universal Soft Floor Covering Adhesive and will stick vinyls, linoleum, natural cork tiles (not pre-glued) and carpets.

DESCRIPTION

Bostik Instant-PRO™ Carpet & Cork Tile Adhesive is suitable for adhering commercial and domestic vinyl's (sheet, tile or slat form) carpets, underlays, PVC backed carpets, needle felts and cork tiles to concrete, cement sheet or wooden subfloors.

RECOMMENDED USES

Because of the wide range of surfaces and floorings, a test of any new combination should be conducted before using.

Not recommended for

- Oily timber
- Oil tempered particle board
- External use.

FEATURES & BENEFITS

- Universal Soft Floor Covering Adhesive
- Low odour and Solvent Free water based
- Flexible
- Highly Resistant to Plastizer Migration
- High Early Bond strength

PROPERTIES

Appearance	Thick Paste
Colour	Off White
Chemical Type	Water based Acrylic
Specific Gravity	Approx 1.3 g/cm ³
Working Temperature	5°C and 50 °C
Coverage	Smooth backed vinyls – 5m ² / L (1.6mm notched trowel) Textured backed vinyls/ PVC backed carpets – 3m ² /L (2.4mm notched trowel) Carpets & Underlay – 3m ² /L (2.4mm notched trowel) Cork Tiles – 3m ² /L (2.4mm notched trowel)
Cure Time	Trafficable after 24 hours
Shelf Life	12 months in unopened containers. Store in cool, dry conditions.

PACKAGING

Available in 1L, 4L and 10L pails

APPLICATION INSTRUCTIONS

Preparation

Ensure the surface is even, clean, dry and free from oil, dust or flaking paint. A very porous or highly absorbent surface should be primed first with Bostik Instant-PRO™ Primer.

Ensure concrete subfloors are free from hydrostatic pressure and test moisture content prior to priming or laying floor covering.

Application

For non absorbent subfloors the open time may be extended to allow a more aggressive instant bond to be made.

Vinyl:

Lay vinyls into wet adhesive - for best results – do not allow adhesive to dry for more than 10 minutes.

Carpets & underlays

For a more aggressive instant bond the open time should be extended to when the adhesive has tacked up. This can be assessed by lightly pressing your finger onto the surface of the adhesive the pulling away – tack up is observed when the adhesive appears stringy/leggy.

Ensure adhesive transfer occurs into the carpet backing.

Cork Tiles

Roll the installation using a 25 – 35kg roller on both directions immediately after laying. Then re-roll after 20 minutes. Contact your nearest Equipment Hire supplier to hire a roller if you don't own one.

Avoid heavy traffic for 24 hours after installation.

PATS (PRE-TESTED ADHESION TO SUBSTRATES PROGRAMME)

This program is intended to eliminate potential field problems by pre-testing Bostik's adhesives with samples of building materials to which the adhesive will be applied. This service is available on large projects where pre-application testing will aid in determining the proper surface preparation method to achieve optimum adhesion. Consult a Bostik representative for further information.

HEALTH AND SAFETY

Bostik Instant-PRO™ Carpet & Cork Tile Adhesive is not dangerous to health or flammable. A Material Safety Data Sheet is available on request.

- This product is of low toxicity, however, ingestion or contact with the eyes should be avoided.
- Splashes in the eye may cause irritation.
- Prolonged skin exposure may cause slight irritation.

PRECAUTIONS

Because of the wide range of surfaces and floorings, a test of any new combination should be conducted before using. Not recommended for oily timber, oil tempered particleboard or external use.

STORAGE

Do not allow to freeze, store out of direct sunlight, keep in original containers tightly closed when not in use.

SHELF LIFE

Minimum 12 months from date of manufacture if stores under cover between 5°C and 30 °C

CLEAN UP

Tools should be washed with water whilst adhesive is still wet.
